About me

I am a Software Engineering student with a solid foundation in programming and object-oriented design. I am eager to apply my technical knowledge, continuously learn new technologies, and contribute to real-world software projects through internships or entry-level opportunities.

Certificates

2024 Ielts 6.5 Certificate

Projects

Sleep Protocol

12/2025 - 2026

Content uploader

<https://www.facebook.com/profile.php?id=61586199961303>

Sleep Protocol is a project created to raise awareness about the importance of sleep in the modern era. Through carefully curated content, the page highlights how contemporary lifestyles often overlook proper rest and recovery. The project blends minimalist design with a reflective tone to encourage viewers to reconsider their relationship with sleep and recognize it as a vital part of daily life.

Todo List

4/2025 - 5/2025

Personal Project

<https://todolist-pied-phi-58.vercel.app/>

NERV TaskSync Todo List: A sleek, Evangelion-inspired web app. Add, complete, and delete tasks with neon effects. Built with HTML, CSS, and JS, using localStorage for persistent data. Sync missions like a NERV pilot!

Portfolio

4/2025 - 4/2025

Personal Project

<https://portfoliodanguwu.vercel.app/>

Amateur web developer crafting thoughtful digital spaces. Inspired by music, art, and anime—where emotion meets code and creativity flows.
